Subject: Distance Requirements

Good morning, all.

I hope you are all having a great morning. Staff received a question about the required distance a liquor/bar/brewery establishment must be from a school and/or place of worship. This was asked because of a post on Facebook about a possible brewery.

The distance required by City Code is 150 ft from building to building. This is something that we would review if/when an application is made for the liquor application. We would also do a code compliance review when a building permit application is submitted. To date, no one representing the location referenced on Facebook (Unique Décor and More/Crimson Anchor building) has contacted the City so we cannot speak on whether this is anything more than a rumor. We have had, however, conversations with a brewer who is looking at a different location on the Square.

We appreciate the question.

Have a great day!

Ryan
